DETAILED ACTION

Page 2

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "optimum" in claim 1 is a relative term which renders the claim indefinite. The term "optimum" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. The term optimum renders position indefinite.

Regarding claim 1,

It is not clear within the claim language, what applicant considers maximum.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuhara et al (PN 6,530,698).

Regarding claims 1, 2,

Art Unit: 2828

Figure 23 illustrates a laser element (LD), a fiber at a position and which will have a coupling efficiency. Column 19 lines 15-16, discloses the position of the LD and the fiber as 50 um and 100 um. Figure 23 illustrates the out going light (G) and the reflected light (Q) not parallel to light of the LD.

Page 3

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kuhara et al (PN 6,530,698) in view of Seto Ichiro et al (JP 2000-193854) and Abe Toshiro (JP 07-038531).

Regarding claim 3,

Kuhara et al does illustrate in figure 23 a laser diode (LD), but is silent as to the LD being a multi-mode oscillation laser.

However, the use of multi-mode oscillation laser in optical transmitter is well know in the art, as disclosed by Seto Ichiro in paragraph [0060].

Kuhara et al does illustrate in figure 23 a fiber, but is silent as to the fiber being 1.3 um zero-dispersion type.

However, the use of 1.3 um zero-dispsersion type fibers in optical transmitters is well known in the art as disclosed by Abe Toshiro in paragraph [0021].

Application/Control Number: 10/575,460

Art Unit: 2828

Kuhara et al illustrates in figure 36 the coupling efficiency of less than 10% in terms of dB.

Allowable Subject Matter

Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ARMANDO RODRIGUEZ whose telephone number is 571-272-1952. The examiner can normally be reached on 9:00 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MINSUN HARVEY can be reached on 571-272-1835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
